

Pritam Kumar Mandal

Bengaluru, India | +91 6290610331 | opbot4096@gmail.com

Profile

Computer Science undergraduate seeking a software development internship. Practising Java through array, string and recursion problems, with foundational knowledge of SQL, HTML and Python. Interested in building useful web applications and improving their behaviour through practical testing.

Education

JSS Academy of Technical Education, Bengaluru

Bachelor of Engineering in Computer Science and Engineering
Visvesvaraya Technological University | Fifth semester

Technical Skills

Programming: Java fundamentals; basic Python

Problem solving: Arrays, strings, recursion, two pointers, sorting and searching basics

Database and web: Basic SQL; HTML fundamentals

Tools: Visual Studio Code; Java Development Kit; LeetCode

Projects and Coding Practice

Bengaluru City Query Assistant | In development

- Defined use cases for a city-information assistant covering local food, places and weather queries in Bengaluru.
- Tested the prototype using everyday questions and identified missing responses and gaps in query coverage.
- Refined requirements for location-aware answers and explored Gemini integration to improve response coverage.

Java Problem Solving | Independent practice

- Practised LeetCode problems involving running sums, array manipulation, anagrams, duplicate removal and sorted squares.
- Wrote recursive Java exercises for factorials, powers, string reversal and character processing.
- Compared sorting and two-pointer approaches to array problems, focusing on correctness and time complexity.

Academic Foundations

Coursework exposure to data structures, operating systems, object-oriented programming and design and analysis of algorithms.
